

# Rugby Atomic Clock Module

Geschrieben von aaron pawlak - 05.03.2018 09:45

---

Hello All,

Has anyone used one of the various atomic clock modules and used them with FC, if yes how did you get on? I'm looking into ways to automatically get the time or periodically set a RTC IC. I'm guessing the only other way is to use the time function of a GSM module

Also, is there a proper tutorial on how to make components which include timings, data formats etc? Your thought most welcome.

Please help

I didn't find the right solution from the internet.
